About me

Frontend Developer with 8 months of experience in web and application development, with a robust mix of technical ability and creativity passionate about creating UI that captivate users and stays current with new design trends.

Experience/Projects

rójsłów.pl · React / Next.js / MongoDB / Tailwind / Figma · **Link**

The app to create and share ideas for collective nouns among animals in polish.

Key features:

- Implementation of CRUD operations
- Users can add new, edit and delete cards created by them.
- User account creation and Google and Github Provider
- User customization
- Models (user, nouns, likes) and queries to MongoDB database
- 'Like' functionality
- Rank system based on earned likes
- Search engine
- Inifnite scroll

Dribble Clone · React / Next.js / Grafbase / Tailwind / Typescript · **Link**

Popular designers' web platform clone.

Key features:

- Implementation of CRUD operations
- User account creation and Google Provider
- User can create, edit and delete a project created by them.
- Pagination
- Models (user, project) and queries to the Grafbase database
- Search engine, also search in filtered categories
- Display similar projects
- A faithful Dribble-like layout

Minas Mongrel · Astro / React / Typescript / Figma · **Link**

Personal blog realization built in Astro.

Key features:

- Recent posts showcased
- Component for dynamic navigation through tags
- Content sorting component via language, date, title, etc.
- Search engine
- Similar posts component
- Graphic layout elements adapt to the size of the browser window
- Page structure built on CSS Grid
